

hTERT ICC Test

Your solution for atypical cytology

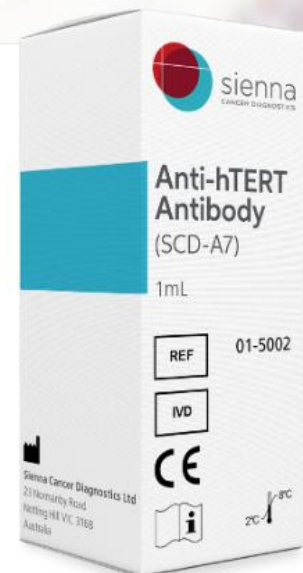

Benefits of adding the hTERT ICC test to your diagnostic workflow:

- Non-invasive immunocytochemistry (ICC) test
- Utilises the same sample used for routine urine cytology
- Compatible with ThinPrep® and other liquid-based cytology preparations
- Improved sensitivity over cytology alone
- Provides clinicians with additional information to assist them in their diagnostic assessment
- Fits seamlessly into existing pathology laboratory workflow
- Currently available in 12 regions globally
